REAL FEAR OF ENCIRCLEMENT

Japan Interprets United States Actions As Hostile

Tokyo Risks Collision

With U.S., Britain By Her Push in the South

This is the second of a series of current conditions in Japan by H. O. Thompson, who for five years has been writing for the United Press manager in Tokyo. He recently returned to the United States.

By H. O. THOMPSON
NEW YORK, July 30.—(U.P.)—Stories in the Japanese press these days about "threatened encirclement by America" are not entirely for the purpose of goading the people into greater efforts for their state. They represent a real fear, based on actions by the United States which the Japanese interpret as definitely hostile.

Here are some of the thoughts and reasonings which go into Japan's policy-shaping councils:

Anthony Eden Hands Japan Stern Warning

Continued from Page One
The British ambassador at Tokyo received a ceremonial denial of this report July 29 from the vice minister of foreign affairs. The report, however, and the Japanese view of it, is a serious one. It is a warning that the United States might make an active alliance with Russia and that Japan was threatened by Great Britain.

In DIRECT CONFLICT
July 29 of the Japanese minister for foreign affairs informed the British ambassador at Tokyo of the agreement reached with the Viceroy government of India for defense.

"Mr. Robert Craigie (British ambassador) at once pointed out in reply that the action was in direct conflict with the categorical denial of the British government."

The Japanese government on July 30 emphasized the statement, issued an official statement, stating the friendly nature of the agreement with the Viceroy government.

"The document also proclaims that the intention is to respect the territorial integrity and sovereignty of French Indo-China," Mr. Josen said.

"On this point let the future speak for itself."

22 Miners Killed In U.K. Explosion

LONDON, July 30.—(CP)—Twenty-two miners were killed in a terrible explosion at Craggallan colliery, near Warrington, Yorkshire, last night. All but six of the bodies had been brought to the surface by the explosion.

One of the injured, M. Broadhead, was hit by a large block of coal which fell from the ceiling nearly 20 feet above him. He was thrown about like a football.

About 100 men working in other sections of the pit were rescued safely to the surface and all returned to the mine in operations.

Germans Move

LONDON, July 30.—(CP)—A Reuters news agency dispatch dated London, July 30, says that German troops moved into the Ruhr valley, presumably because of Royal Air Force raids have arrived in unoccupied France, mainly along the Rhine.

Weather

Funny Business

Sabotage Is Suspected In Quebec Plant

Continued from Page One
and removed from the plant. The British government is "in something like a all-out attack." It was not until Sunday that they were left to plant to fill about 3,000 other building orders in the plant.

Before long United States orders had quit work, too. The British government was the most serious interruption of war production in making the war began."

Mr. Howe said: "The amount to thousands of tons of aluminum."

"Particularly reserves in Canada and Great Britain, it is expected, will be sufficient to avoid interruption in airplane production here or overseas."

Two companies of active army men were moved to Avondale as a precautionary measure. On Sunday but considerable delay had been experienced in making the necessary arrangements with municipal government authorities.

PREVENT REVENUE
Mr. Howe said that to avoid a recurrence of such delays in future, an order-in-council has been passed authorizing the military to take possession of the plant in the event of a strike.

He said that the plant is a "very large one," Mr. Thorburn said.

"The amount of the united drive against the plant is not yet, but it is likely to be a very large one," Mr. Thorburn said.

Expert Criticizes Australia's Plans

For Ship-Building

SYDNEY, Australia, July 30.—(A.P.)—J. C. Crawford, British syndicate member of the Royal Australian Naval Dockyard, today said that Australia's ship-building program is "playing at ship building."

Australia aimed to build 60 ships in five years. Crawford's program involved the number of ships to be built in one year.

The premier would be expected to meet the "vow" and that was between Germany and Russia "a bringing serious effect on Japan" he had not explained.

Japan, he told the opening of the 16th annual session of the general mobilization commission, "is determined to proceed on an historic renovation in policies from an entirely new standpoint."

FULL MOBILIZATION
According to a version of the speech broadcast by Domei Japanese news agency, the premier said it was difficult to predict where the Japanese navy would stand in 1942. It was not to be a situation that any army in the Far East, adding that the government was "doing everything within its power to mobilize all resources and manpower for the war."

Newspapers blamed what they called United States meddling in Japan's war effort. They said the United States had "interfered with Japan's freedom of action."

Yet newspapers, discussing the possibility of a total oil embargo by the United States, asserted that London economic officials already have estimated that Japan had stockpiled enough oil for several years.

The newspaper Nishiichi said that the Japanese navy had been able to have an influence on heavy industry.

RESTRICTIONS
After being halted for 24 hours, the Standard Oil Company was permitted to resume domestic deliveries of oil to Japan. The company said it was unable to operate because of restrictions upon paying currency to foreign firms.

Reports from Dairen said that oil tankers had been ordered to stop at the port. The company said it was unable to operate because of restrictions upon paying currency to foreign firms.

Wellen declined to indicate the results of the meeting. He said it was believed, however, that the Japanese government would be able to have an influence on heavy industry.

Wellen, after conferring with President Roosevelt by telephone, said that the Japanese government had received a message from the United States that it was unable to operate because of restrictions upon paying currency to foreign firms.

Swift Jap Action

Is Needed: ononye

TOKYO, July 30.—(AP)—Japan needs "swift, determined execution of her national policies," Premier Fumimaro Konoye declared today as the Japanese press grew increasingly critical of British and United States activities and described the Netherlands East Indies as their tool.

The premier would be expected to meet the "vow" and that was between Germany and Russia "a bringing serious effect on Japan" he had not explained.

Japan, he told the opening of the 16th annual session of the general mobilization commission, "is determined to proceed on an historic renovation in policies from an entirely new standpoint."

FULL MOBILIZATION
According to a version of the speech broadcast by Domei Japanese news agency, the premier said it was difficult to predict where the Japanese navy would stand in 1942. Britain May Take Alberta Seed For Livestock Feed

Increase For Province Could Export Alfalfa, Clover Needs: Good Crops Is Reported

Great Britain may become a new market for the export of Alberta alfalfa and clover seed, according to provincial agriculture department officials. These field crops would be used for feed purposes and officials stated that reports received indicated that Britain would be in the market for Alberta-grown alfalfa and clover seed.

Enrollment Of Air Cadets To Open In August

Enrollment of air cadets will be held in August. The committee is now asking for volunteers from men with some training and an interest in the movement to take posts as officers and instructors.

Members of the committee are Mr. William, chairman; Alan D. Harvey, K.C., honorary secretary-treasurer; William Muir, Colin D. MacKenzie, and D. J. W. "Wag" May. O.R.E. D.F.C. and W. Leigh Brimble are attached to the committee in an advisory capacity. John Michaels is chairman of the finance committee.

Plans are now being made to open a downtown centre where boys interested in joining the league may be enrolled between August 15 and September 15. They must be physically fit, 15 to 18 years of British subjects and will be enrolled for a two-year period of training.

The boys will wear uniforms of air force blue, but also wear similar to the R.C.A.F. and will take their training about twice a week, outside of school hours.

Offers from men who can instruct are asked for immediately. Mr. Williams said that the committee will give their services voluntarily, possibly at their own expense, out-of-pocket expenses.

The training covers many subjects taught in the Canadian Air Force, including drill, physical training, aerobics, navigation, mechanics and theory of flight.

Campbell Named To Chest Group

Director of publicly for the Alberta government and former C.A.P. member, Mr. E. C. Campbell has been named chairman of the chest group for the chest of Edmonton, it was announced Tuesday.

Mr. Campbell will work with H. R. Milner, K.C., general chairman, Johnnie Brown, budget chairman, Harvey Harrison, campaign chairman, and other officials in planning the chest drive. The chest drive will commence September 29, with an objective of \$75,000.

Announcement of the names of the various welfare groups which will shoulder their own individual financial campaigns to meet the single chest appeal for funds, is expected this week. The chest drive will raise funds for the 1942 requirements.

Deep-Sea Divers Find Warmest Water Nile, Panama Colder—Finish Hydro Job In Bluefish Lake North Of Yellowknife

Brawny, moustached Joseph Knight, who was born in London and is "getting close to 60," has been in the deep sea diving business for 35 years. He has dived in the Nile river in Egypt and in the Panama canal, but the warmest water he ever worked in was glacier-fed Bluefish lake, up the Yellowknife in the heart of the North West Territories.

Mr. Knight whose powerful frame would be a neat fit for most deep-sea divers and his 20-year-old son George, who stands some six-foot-five with the ruddy but rugged build of a boxer, passed through Edmonton Tuesday on their return from Yellowknife where they completed a diving job on the Consolidated Mining and smelting hydro power development.

They were flown south by North Saskatchewan Airways, and took the Trans-Canada Air Lines plane for their homes in Vancouver. The Knights father and son, are bridge construction men and the diving is part of the game. If a bridge or breakwater project is started which will take two years, the Knights diving operation is involved. They set savings and two years. They set savings and two years.

You have to be practically a civil engineer and know how to work from the blueprints," the elder Knight explained, "because under water you are on your own. Consulting hydro power development."

Harvest Help Shortage Seen For Province

Scarcity of experienced farm help is being felt throughout the province at the present time and may develop into an acute shortage by the time harvest gets under way, according to officials of the Alberta Employment Service.

"It is too early to predict what will be the situation when harvesting begins, as there are many factors which enter into the case," said an official. "But, the fact of the matter is, there is a shortage of experienced farm hands right now."

He pointed out that experienced men are not required in large numbers at the present time, but the condition prevailing with the anticipated heavy requirements of the crop is at all times will cause an acute situation.

It was pointed out that the increased use of Alberta lumber in the war effort had caused many men, many had enlisted; many others were employed by the railways and others had found different types of work.

If organizations employing skilled farm hands would release them for harvest work, the situation would be eased.

It was pointed out that, so far as the army is concerned, only the experienced farm hands will be released from military duty for harvest work.

For providing entertainment for the troops, Mr. Van Hise disclosed the importance of the credits for the splendid appearance of the grounds and the attention given flowers, bushes, etc., goes to the caretaker, C. F. Verby, a war veteran and a Legion member.

The improvement of the grounds and the layout as it stands at the present time, was planned in April, 1939, as a tribute to the flight of the bronze shield, which bears an inscription, charged with new and added meaning as a result of events of the last two years. It reads: "Presented by the school children of Edmonton, Middlesex, England, to the school children of Edmonton, Alberta, Canada, to commemorate the victory conclusion of The Great War 1914-1918."

John Van Hise, manager of the Memorial Hall, came along while it was being done by Ed Padley Griffith, one of the staunch pillars of the Legion, and the late Mrs. M. M. W75 Jones, chairman of the board.

August Rivals June In Number Of Marriages

MIDSUMMER month of August is the liveliest month of the year for marriages. This year to "become a promise" for the number of pretty and interesting weddings planned for this month already rivals the number of such weddings held in June, the traditional marriage month.

Days of sunshine and flowers have proven an inspiration to Dan Cough, who is working out in Edmonton this summer, about the snows widely and gaily.

Commencing on Friday, the first day of August, and continuing for the first two weeks, there is scarcely a day without a wedding. On Friday an interesting ceremony will be performed in Vancouver, when Miss Claudine MacLennan becomes the bride of Mr. Arthur E. Henderson, who is a well-known Canadian Press editor in Edmonton.

Another pretty Friday wedding will be that in which Rhoda Menzies, daughter of Mr. and Mrs. C. G. Macdonald, will be joined with Miss Elizabeth Smith, daughter of Mr. and Mrs. J. C. Smith, of Edmonton, in a ceremony at the home of Mr. and Mrs. H. H. Pincher Creek.

Early August will see the exchange of marriage vows between Cath, youngest daughter of Mrs. F. E. Evans of this city and Percy Officer, son of Mr. and Mrs. F. E. Evans of this city. The ceremony will be performed in the home of Mr. and Mrs. J. C. Smith, of Edmonton, in a ceremony at the home of Mr. and Mrs. H. H. Pincher Creek.

Early August will see the exchange of marriage vows between Cath, youngest daughter of Mrs. F. E. Evans of this city and Percy Officer, son of Mr. and Mrs. F. E. Evans of this city. the social round

VANCOUVER—Sir Ernest and Lady Macmillan, and their daughter, Miss Jean Macmillan, and son, Ross Macmillan, who have been spending the summer months at the Pacific coast, left on Wednesday to return to their home in London.

Miss Audrey Macmillan left Wednesday by TCA plane for Rosemont, Montana, where she will visit friends and attend a rodeo there. Miss Macmillan will return to the city in a week.

Dr. and Mrs. W. H. Hunter, who have been spending a holiday in Jasper, are expected to return to the city on Thursday.

Mr. and Mrs. H. E. Van Loon of Chicago, Ill., who have been visiting in Edmonton since mid-June, will be leaving for their home in Chicago on Friday.

Mr. and Mrs. John Stanley St. Mary have returned to their home in Vancouver after a month's honeymoon trip in Edmonton, Calgary and Banff.

Mr. Frank Maginn, who has spent the past seven weeks visiting with friends in Edmonton and Calgary, has returned to her home in Vancouver.

Centring the interest of many friends in Edmonton and Calgary, the marriage will take place in the home of Mr. and Mrs. J. C. Smith, of Edmonton, in a ceremony at the home of Mr. and Mrs. H. H. Pincher Creek.

Golf Clubs Are Gay Summer Rendezvous

ANSWERING the call of the fairway and the putting green, members of Edmonton's golf clubs have spent many hours tramping the 18 holes of the courses and many more hours in the shade of the attractive clubhouse.

Always the centre for social life in summer, the different club houses have been the scene of many attractive private parties as members have taken advantage of the picturesque setting provided by the rolling lawns and pretty clubhouse.

As well as the many private parties each club of course has entertained at some functions for club members. The parties have been quiet affairs in accordance with summer demands, but for all their inexpressive they have been gay reunions for members.

PALM DANCE
In the spacious lounge of the Country Club house high over the city, a group of green and white silk took the place of a big band and carrying a superb bouquet of white flowers.

Mr. Victor Osterberg was the bridegroom and Miss Irene Smith was the bride. The ceremony was performed in the home of Mr. and Mrs. J. C. Smith, of Edmonton, in a ceremony at the home of Mr. and Mrs. H. H. Pincher Creek.

Miss M. Smith Is Bride Of Mr. J. Knight

FOCUSING wide interest in both eastern and western Canada, the pretty wedding ceremony performed in Vancouver on Thursday, July 24, when Margaret Elizabeth Smith, formerly of Edmonton and recently of Toronto, was married to Mr. J. C. Knight, of Edmonton, was a most interesting one.

The bride is a 1937 graduate of Macdonald Institute, Quebec, and a 1939 graduate of Acadia University. She held the position of assistant director of Chasteline Institute, Macdonald Publishing Co., Toronto.

Setting for the ceremony was in the home of the bride's sister, Mrs. Victor Osterberg, with Rev. O. H. Villet, formerly of Edmonton, officiating. The ceremony was witnessed by a bank of lovely bridesmaids, phlox and gladioli.

PRINTED SILK FROCK
Given in marriage by Mr. Fred T. Jackson of Clover Bar, the bride was wearing a dress of white silk with a charming figure of her wedding veil. The bride carried a big bouquet of white flowers.

Family Lived All Alone On Desert Island

SYDNEY, Australia, July 30.—A 31-year-old woman, Mrs. Margaret L. Smith, who has been living alone on a desert island in the Pacific Ocean near the equator, and there were no other children.

There were some on the ship but none of the adults. The crew were all boys who were even when she got to Sydney. She was not allowed to play with other children. The doctors said she should keep away from them until she acquired the immunity to germs which normally reared children have.

Her English father, T. H. Manning, is the administrator of the island which is the largest still in the Pacific. With his five children and his wife, he has been there for a year and stayed three.

"We took some garden soil. It grew tomatoes and beans for 12 months and then it would grow nothing," said Mrs. Manning.

"In the last three months we were very short of food because fish never came there. Once a millionaire yacht called and my husband was able to talk through the radio and get supplies when we were in England. We lived on canned food and mainly towards the last my husband and I existed on beef and rice. Everything else we saved for Joanne. We were at the end of our supplies when we were taken off."

"I have heard it said that sharks have no backbone, but I have had. One of our hobbies was to make them into walking sticks."

"During their last year on the island the only other humans there were two law enforcement men from the Gilbert Islands."

"I have heard it said that sharks have no backbone, but I have had. One of our hobbies was to make them into walking sticks."

ories, they attracted a miners and prospectors over the Yellowstone country. The amazing thing about their diving operations was the warm water. "In the canal and the Nile river, Pacific coast, I have never seen such warm water," Knight said.

"The temperature in it was 68 degrees and they said it was warmer than it had ever been before," George said. "Nobody could believe it and the lake is fed by it. As a matter of fact the water is so warm that it wasn't freshening to drink. It

as warm in the outlet hydro tunnel, which is a tailrace."

The men went down of water at the intake of the tunnel, which carries the water through 3,000 feet of rock. They cleared away debris and made the stop-logs fit so the intake could be closed without injury. In the tailrace the men cleared out the boulders and other obstructions.

CALLED IN DIVERS

When the stop-logs, made of concrete, were first put in the hole properly and allowed to leak through. To plug the hole an effort to stop the water

men could work at the sandbags, a couple of many other articles were in. Finally the contract it necessary to bring the Diving is a man's work," admitted. "You can't exclaim invalid and be a diver," Knight said.

In 1906 he was diving in and in 1912 he salvaged "Newport" in the Panama it could be floated to Sisco for repairs.

He later salvaged the "Paragut" at Juneau, Alaska, the "Admiral Evans" at Alaska.

There were some alliga-

FULL OF OCTOPUSES

He worked on the breakers at Victoria in 1914-15-16, when the water was full of octopuses. "We used to hook them, take them out and give the Japanese fishermen for halibut bait," said Knight.

One octopus wrapped itself around his father's leg while he was working, said Knight. "Oh, that was no joke, it cut it off with my knife," said Knight.

George sand-hogged on the breakers at Narrows bridge at Victoria in 1917-18, when his father died, said Knight.

Airships Help In U. S. Patrol Of Atlantic . . . Going Down . . . Keen-Eyed Canadians Learn Anti-Tank Tactics

An United States navy airship from the naval air base at Lakehurst, N.J., hovers over an American freighter while on patrol over the Atlantic. The airships are coming back into their own and the base at Lakehurst is another U.S. defence post feeling growing pains. Officers and crews are being trained for the new blimps ordered by the navy. Though relatively much slower than a plane, the blimps have several advantages for specific tasks. They furnish a steadier platform for observation. Mines and submarines can be spotted easier from a hovering blimp than from a speeding plane. And they can hover for hours over a suspect vessel where a heavier-than-air craft would soon have to be speeding back to its base for more fuel. They are already doing yeoman duty in the American patrol of the Atlantic.

The matron of the hospital where he has been confined by illness hurried to congratulate Lieutenant P. S. Bhagat, of the 21st Bombay Sappers, first Indian to be awarded the Victoria Cross in the present war. She shakes his hand warmly as admiring fellow officers of the Imperial Army look on. Previously mentioned in dispatches for his gallantry, the 24-year-old officer received the Victoria Cross for his gallant work during the advance from Gallabat to Wani in Africa. He went ahead of the troops to clear mine-fields and was blown up twice in four days. Miraculously, he escaped major injuries, receiving only minor wounds. Lt. Bhagat has two brothers serving as officers, one in Egypt and one in Singapore.

Moscow Bombed By Nazis

Hardly a vestige of the rear wall of this apartment house in Moscow remains in place, following the explosion of a Nazi bomb alongside it. The rooms are almost as cleanly exposed as if the walls had been taken away by workmen. German airmen struck again at the Red capital, but Soviet authorities declared that no military damage had been done. Windows in the residence of the U.S. ambassador were smashed by bomb blast. (Acme Radiophoto from Moscow.)

All that was left of a bombed London building was this twisted framework of an elevator shaft. Demolition workers are dismantling it.

Flying Fortress On "Fantastic" Raid

This series of photos was made July 24, as one of the huge Boeing B-17 four-engined Flying Fortresses obtained from the United States, left an undisclosed British airport to join other bombers of its type in a raid upon the damaged Nazi pocket battleship Gneisenau at the French (occupied) port of Brest. The British air ministry reported direct hits upon the vessel from a height so "fantastic" that the scream of bombs was probably the first warning the Germans had of the attack. Hita were also scored upon the Nazi vessel's sisterships, Scharnhorst, which had been moved to another French port, La Pallice, 240 miles southward, when daily R.A.F. raids over Brest repeatedly undid attempts to repair earlier bomb damage. In the above, the top photo shows two of the ship's crew, probably pilot and navigator, going over a map with a ground officer. The middle photo shows the crew entering the plane and the bottom picture shows the take-off. The Flying Fortresses easily operate at heights of 35,000 feet and upwards. These pictures were radioed from London to New York.

☆☆☆

Marie Kiley, selected as the "V" girl at the Buckingham hotel, in New York, is shown sitting on a huge "V" flag, said to be the first of thousands soon to be seen all over the United States. The flag bears Britain's victory symbols—the letter "V" and the Morse code equivalent, dot dot dot dash.

An important part of the training of artillery troops in the Canadian army is given over to anti-tank tactics. Here as in all phases of modern warfare, speed and mobility are essential. Photo at the top shows soldiers of the R.C.A. at Petawawa camp training the sights of an anti-tank gun on a moving target. Bottom photo illustrates mobility of this weapon and the speed with which it can be moved from one place to another, then mounted and dismounted in a few seconds time.

☆☆☆

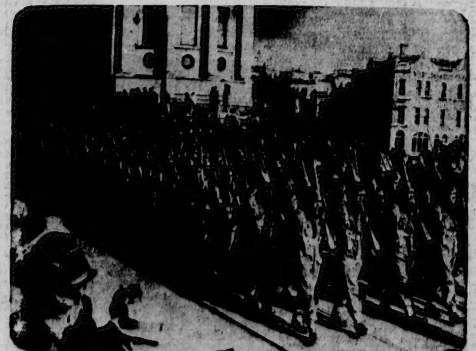

This spectacular picture was taken just as a billow of white hot flame blew off the top of a United States grain elevator at Chicago, during a \$300,000 fire of mysterious origin. More than 350,000 bushels of corn were destroyed. Furnace-like heat seared surrounding territory for blocks, melted steel girders like butter, and repeatedly drove back firemen working to control the blaze.

"Miss Toronto"

Rose Burkett, golden-haired beauty, was crowned "Miss Toronto" for 1941 at the annual Toronto Police A.A.A. games.

Maori Men March In Masterful Military Manner

Clean-cut warriors, Maori soldiers parade smartly down Queen Street in Auckland, New Zealand. These descendants of the island's aborigines constitute reinforcements for the Maori battalions overseas.
